MM1L 系列

带剩余电流保护塑料外壳式断路器

MM1L Series moulded Case Earth Leakage Circuit Breaker

MM1L 系列带剩余电流保护塑料外壳式断路器

MM1L Series Molded Case Earth Leakage Circuit Breaker

MM1L系列 带剩余电流保护塑料外壳式断路器

MM1L Series Molded Case Earth Leakage Circuit Breaker

产品概述 Outline

该断路器额定绝缘电压至1000V，适用于交流50Hz，额定工作电压至400V，额定工作电流至1250A的配电网路中，用来分配电能和保护线路及电源设备免受过载、短路、欠电压等故障的损失。同时也能作为电动机的不频繁起动及过载、短路、欠电压保护。

该断路器具有体积小、分断高、飞弧短等特点，是用户使用的理想产品。断路器垂直安装(即竖装)，亦可水平安装(横装)。

本产品符合IEC60947-2、GB/T14048.2等标准。

This breaker's rated insulation voltage is 1000V, is applied to distribution network circuit of AC 50HZ, rated working voltage up to 400V, rated working current up to 1250A, which is for electric energy distribution, circuit protection, protecting power supply facility from destroying by the fault of overloading, short circuit and undervoltage, meanwhile it is also used for protection from un frequent starting, over loading, short circuit and unervdoltage of the electromotor

This breaker has such characteristics of company volume, high short circuit interrupting capacity, short flach arcing and etc which is a ideal product for users, This breaker can be installed vertically(upright), and also horizontally.

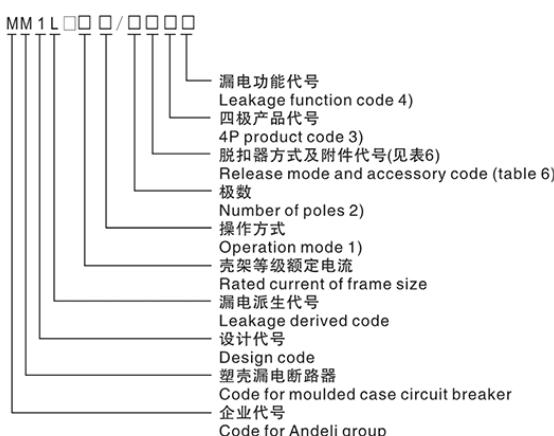

This breaker comply with standard IEC60947-2、GB/T14048.2.

适用工作环境及安装条件 Suitable working environment and installation condition

- 海拔高度2000m以下
- 周围介质温度不高于+40℃ (对船用产品为+45℃) 和不低于-5℃
- 能耐受潮湿空气的影响
- 能采收霉菌的影响
- 能耐受核辐射的影响
- 最大倾斜度为22.5°
- 在受到船舶正常振动时能可靠工作
- 在受到地震情况 (4g) 能可靠工作
- 在无爆炸危险的介质中，且介质无足以腐蚀金属和破坏绝缘的气体与导电尘埃的地方
- 在没有雨雪侵袭的地方

- Altitude less than 2000m
- Ambient medium temperature is from -5°C to +40 °C (+45 °C for shipping product)
- Can withstand moist air
- Can withstand mold
- Can withstand nuclear radiation
- Max inclination is 22.5 °
- It can still work reliably if the product subjects to the normal vibration from ships
- It can still work reliably if the product subjects to the earthquake(4g)
- Put in the place where there is no explosion danger and conductive dust, can't corrode metal and destroy the insulation sheet.
- Put in the place where there is no sleet.

断路器型号及含义 Circuit Breakers codes and implications

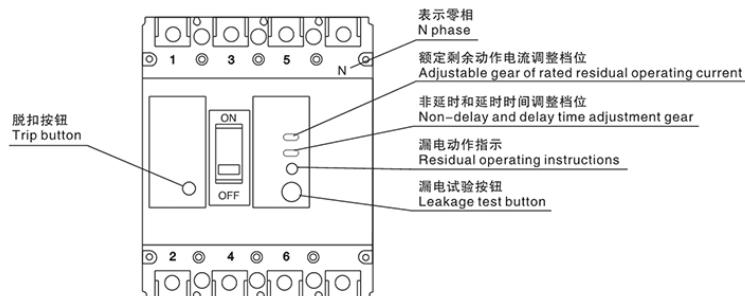

注： 1) 手柄直接操作无代号；电动操作用D表示；转动操作用Z表示。
2) 三极用3表示；四极用4表示。
3) A型：N极不安装过电流脱扣元件，且N极始终接通，不与其它三极一起合分；
B型：N极不安装过电流脱扣元件，且N极与其它三极一起合分；
C型：N极安装过电流脱扣元件，且N极与其它三极一起合分；
D型：N极安装过电流脱扣元件，且N极始终接通，不与其它三极一起合分；
4) 漏电脱扣不带报警无代号；漏电报警又脱扣用I表示；漏电报警不脱扣用II表示。
Note: 1) Manual vehicle direct operation: no code; D for electric operation: Z for rotational operation.
2) The 3 poles is represented by 3; the 4 poles is represented by 4.
3) Type A: Pole N shall not be installed with over-current tripping element, and it always switches on and off together with other three poles;
Type B: Pole N shall not be installed with over-current tripping element, and it always switches on and off together with other three poles;
Type C: Pole N shall be installed with over-current tripping element, and it always switches on and off together with other three poles;
Type D: Pole N shall be installed with over-current tripping element, and it always switches on and off together with other three poles;
4) Leakage trip no alarm: no code; I for leakage alarm and trip; II for leakage alarm no trip

主要特点 main feature

- 剩余电流三相保护: MM1L断路器实现接地故障保护, 常规的带剩余电流保护断路器的漏电保护模块工作电源取样为二相, 本系列断路器为三相, 若缺任一相, 断路器漏电保护模块仍能正常工作;
- 现场可调: 额定剩余动作电流 $I_{\Delta n}$ 及剩余电流动作时间(非延时和延时)根据实际情况现场可调;
- 低电压保护: 当相电压降低至50V, 漏电保护模块仍能正常工作;
- 具有漏电报警输出功能: 当设备或线路的剩余电流, 达到或超过设定值, 带漏电报警单元模块的断路器输出一个无源接点信号, 驱动相应的报警装置;
- 安装具有互换性: 外形尺寸和安装尺寸与 MM1 系列断路器同规格相同(MM1L-630与MM1L-800相同), 安装具有较好的互换性。
- Residual current three-phase protection: MM1L circuit breaker achieves ground fault protection. The working power of the conventional leakage protection module with residual current circuit breaker is as follows: Two-phase, this series of circuit breakers are three-phase, if any phase is missing, the circuit breaker leakage protection module can work normally;
- Field adjustable: rated residual operating current $I_{\Delta n}$ and residual current operating time (non-delay and delay) are adjustable on site according to the actual situation;
- Low voltage protection: When the phase voltage is reduced by 50V, the leakage protection module can still work normally;
- With leakage alarm output function: When the residual current of the equipment or line reaches or exceeds the set value, the circuit breaker with the leakage alarm unit module outputs a passive connection Point signal, drive the corresponding alarm device;
- Installation is interchangeable: the external dimensions and installation dimensions are the same as those of the MM1 series circuit breakers (MM1L-630 and MM1L-800 are)

注:

脱扣器方式及内部附件首位数字2表示电磁(瞬时)脱扣器,3表示热动一电磁(复式)脱扣器;后两位数字表示内部附件代号,如无附件则用00表示。

MM1L-400、630中228、328、248、348规格辅助触头为一对触头(即一常开,一常闭),268、368规格辅助为三对触头(即三常开,三常闭)。

MM1L-100、225中220、320、240、340规格辅助触头可提供二对触头(即二常开,二常闭),但须在订货时注明。

MM1L系列如带漏电报警单元模块,则附件只提供▲规格;漏电报警单元模块有以下两种方式,用户根据需要在订货时注明:

方式一:当发生漏电,漏电报警模块发出信号,同时断路器脱扣;

方式二:当发生漏电,漏电报警模块发出信号,但断路器不脱扣,此方式为满足特殊场合需要,用户采用此功能保护电器时请慎重考虑。

漏电报警模块接线图见产品标识或使用说明书,P1-P2、P3-P4为常开及常闭触点,触头容量为AC230V5A, P5-P6端输入电源为AC50Hz, 230或400V(根据用户需要选择)。

Note:
 Release mode and internal accessory code The first digit 2 indicates the electromagnetic (instantaneous) release, 3 indicates the thermodynamic-electromagnetic (duplex) release; the last two digits indicate the internal accessory code, if there are no accessories, use 00.

In MM1L-400, 630, the auxiliary contacts of 228, 328, 248, and 348 specifications are a pair of contacts (that is, one normally open, one normally closed), and the auxiliary of 268, 368 specifications are three pairs of contacts (that is, three normally open, Three normally closed).

MM1L-100, 225 220, 320, 240, 340 auxiliary contacts can provide two pairs of contacts (ie two normally open, two normally closed), but must be specified when ordering.

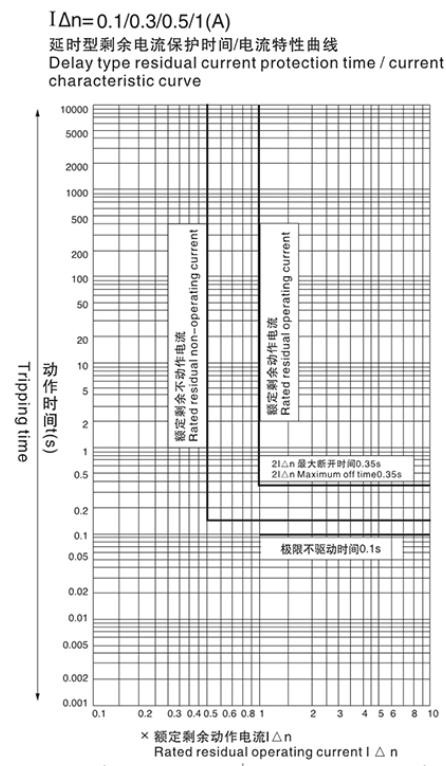

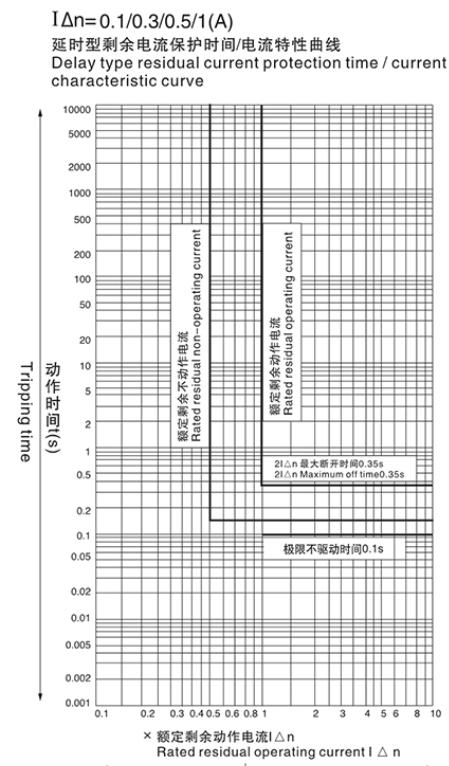

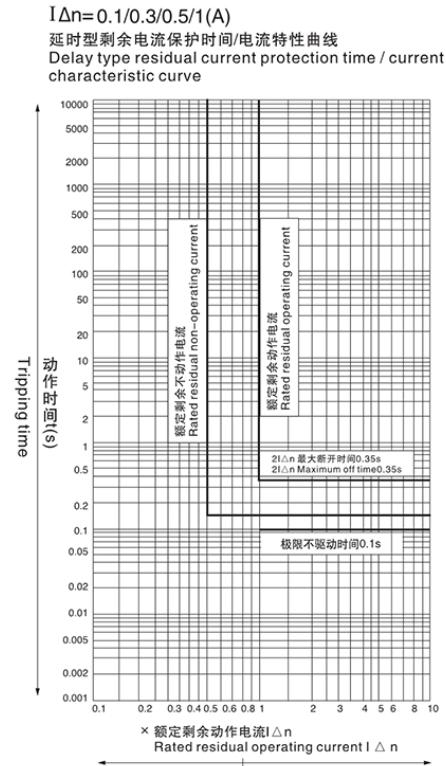

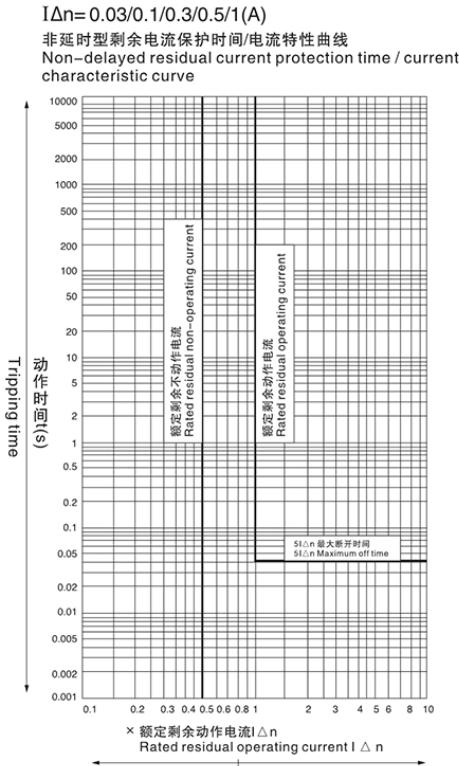

If the MM1L series has a leakage alarm unit module, the attachment only provides ▲ specifications; there are two ways for the leakage alarm unit module, which the user indicates when ordering:

Method 1: When a leakage occurs, the leakage alarm module sends a signal and the circuit breaker trips at the same time;

Method 2: When a leakage occurs, the leakage alarm module sends a signal, but the circuit breaker does not trip. In order to meet the needs of special occasions, users should consider this carefully when using this function to protect electrical appliances.

See the product identification or instruction manual for the wiring diagram of the leakage alarm module. P1-P2, P3-P4 are normally open and normally closed contacts, the contact capacity is AC230V5A, and the input power of P5-P6 is AC50Hz, 230 or 400V (according to the user Need to choose).

剩余电流保护特性曲线 Characteristic curve of residual current protection

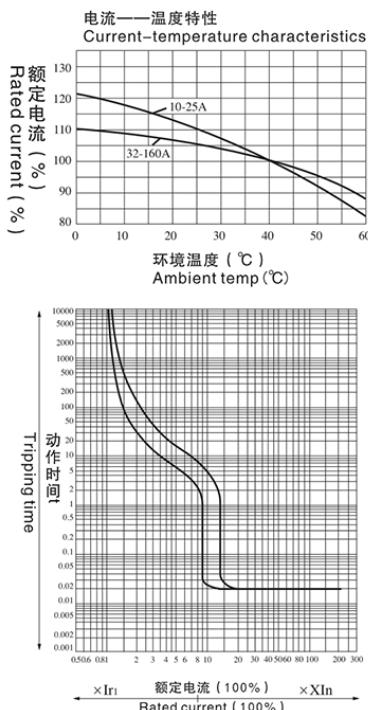

MM1L 系列带剩余电流保护塑料外壳式断路器

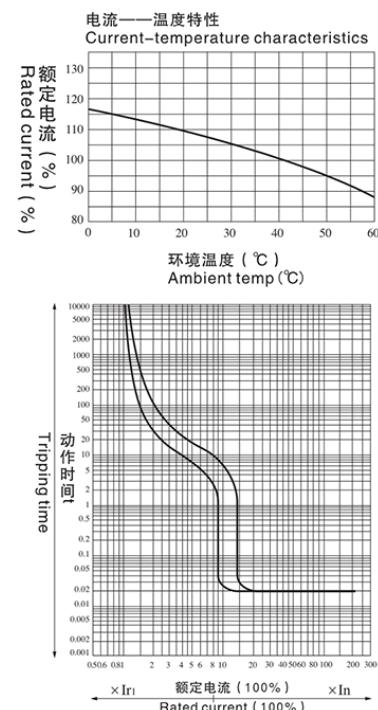

MM1L Series Molded Case Earth Leakage Circuit Breaker

断路器特性曲线 Tripping characteristics (curve)

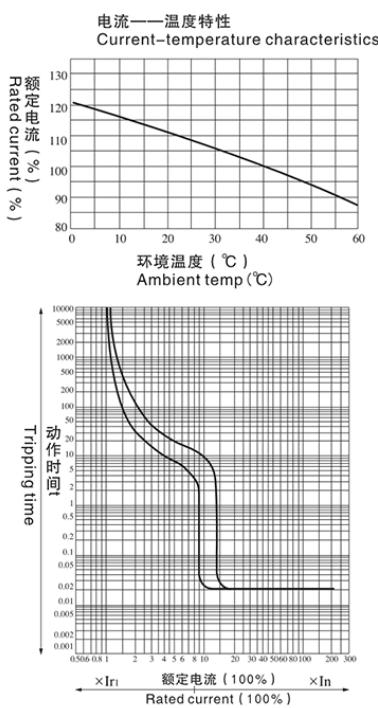

说明：特性曲线是在冷态，三相负载下测得。
 Note: The characteristic curve is measured under the cold state and three-phase load.

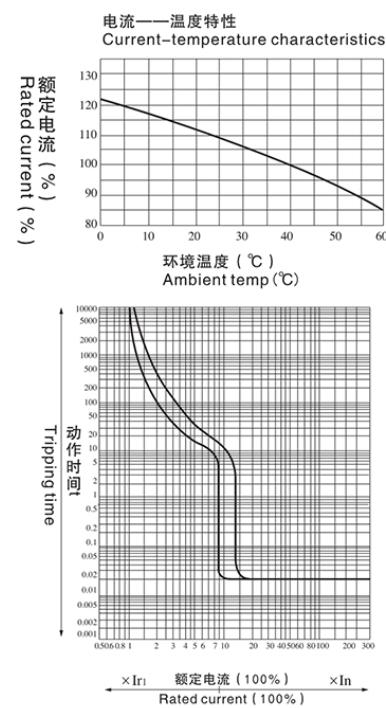

MM1L-125S、M 时间/电流特性曲线
 MM1L-125S、M Time / current characteristic curve

MM1L-250S、M 时间/电流特性曲线
 MM1L-250S、M Time / current characteristic curve

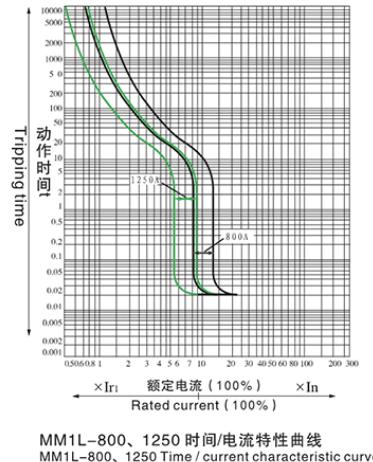

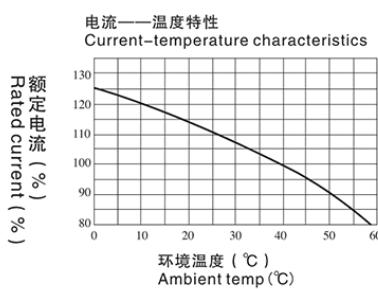

MM1L-400M 时间/电流特性曲线
 MM1L-400M Time / current characteristic curve

MM1L-630M 时间/电流特性曲线
 MM1L-630M Time / current characteristic curve

断路器特性曲线 Tripping characteristics(curve)

说明：特性曲线是在冷态，三相负载下测得。
 Note: The characteristic curve is measured under the cold state and three-phase load.

降容系数 Derating factor

断路器环境温度变化的降容系数
 Derating factor of circuit breaker ambient temperature change

表5 Table 5

| 型号 Type | 降容系数 (In) Derating factor (In) | | | | |
|-----------------|--------------------------------|-------|-------|-------|-------|
| | +40°C | +45°C | +50°C | +55°C | +60°C |
| MM1L-125(63壳架) | 1 | 0.94 | 0.88 | 0.81 | 0.74 |
| MM1L-125 | 1 | 0.96 | 0.91 | 0.85 | 0.78 |
| MM1L-250 | 1 | 0.97 | 0.94 | 0.90 | 0.86 |
| MM1L-400 | 1 | 0.95 | 0.89 | 0.82 | 0.75 |
| MM1L-630 | 1 | 0.94 | 0.88 | 0.82 | 0.76 |
| MM1L-800 | 1 | 0.94 | 0.87 | 0.80 | 0.72 |
| MM1L-1600(1250) | 1 | 0.92 | 0.85 | 0.79 | 0.70 |

注：以上降容系数均在通于壳架额定电流下测得。
Note: The above derating factors are measured under the rated current through the shell.

使用与维护 Use and maintenance

断路器各种特性及附件由制造厂整定，在使用中不要随意调节，用户务必对本产品技术资料详细了解后再对断路器的相关参数进行调整。

断路器手柄可以处在三个位置，分别表示闭合、断开、自由脱扣三种状态，当手柄处于自由脱扣位置时，应向断开方向扳动手柄，此时断路器再扣，然后才能合闸。

请用户遵守存储和使用条件，从制造厂发货之日起不超过12个月，产品如因制造质量问题发生损坏或不能正常使用时，制造厂负责维修或更换。

various characteristics and accessories of the circuit breaker shall be set by the manufacturer and shall not be adjusted arbitrarily during use. The user must understand the technical data of the product in detail before adjusting the relevant parameters of the circuit breaker.

the handle of the circuit breaker can be in three positions, which respectively represent the three states of closing, opening and free tripping. When the handle is in the free tripping position, pull the handle in the opening direction. At this time, the circuit breaker can be closed only after it is pulled again.

the user shall observe the storage and use conditions, which shall not exceed 12 months from the date of delivery by the manufacturer. If the product is damaged or cannot be used normally due to manufacturing quality problems, the manufacturer shall be responsible for repair or replacement.
